BEST SCORE	CURRENT RANK	# COMPETITORS	SUBS. TODAY
0.4135	60	513	0 / 3

EVALUATION METRIC

$$R^2 = 1 - \sum_i (y_i - \hat{y}_i)^2 / \sum_i (y_i - \bar{y})^2$$

The metric used for this competition is the R squared coefficient of determination for regression, which is the sum of squared error (SSE) over the variance of the data, see: wikipedia

(https://en.wikipedia.org/wiki/Coefficient_of_determination), sklearn (https://scikit-learn.org/stable/modules/generated/sklearn.metrics.r2_score.html).

R^2 ranges from negative infinity to 1 where higher values are better.
